FABRICWALL

Stretch Systems for Walls & Ceilings

Stretch Fabric Systems for Walls & Ceilings

FABRICWALL

FabricWall is a site-built, stretch fabric system for walls and ceilings. FabricWall's Track System accepts and holds tight a variety of fabrics while utilizing sound absorbing cores to create beautiful, high performance surfaces. Using FabricWall's stretch system is a great way to control sound beautifully.
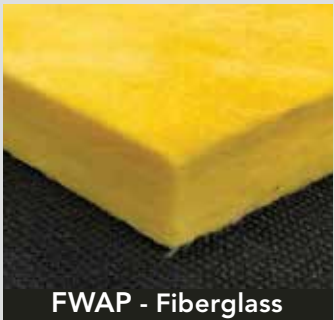

CORE

Core is the material that is installed inside the frame of the track. FabricWall offers several types of core for different applications.
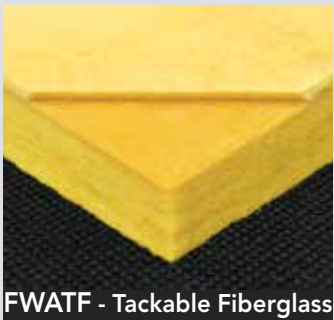

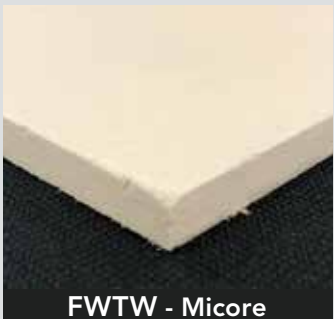

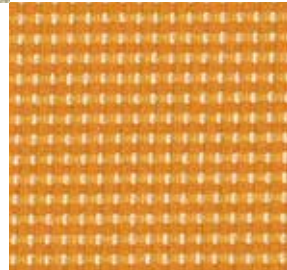

NEW

FWPOLY - Polyester

FWAP - Fiberglass

FWATF - Tackable Fiberglass

FWTW - Micore

TRACKS

Track is the framework that holds the fabric tight and in place. FabricWall's Track System is available in four thicknesses: 1/2", 5/8", 1" and 2".

FABRICS

Although most fabrics work well with FabricWall's Track System, it is imperative to choose a fabric that fits and holds in the track selected. All of FabricWall's standard, upgrade and premium fabrics have been tested and work well with the track system. When using your own fabric selection, we always recommend a mock-up.
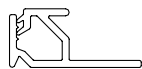

TOOLS

Tools are a very important component for a successful installation. FabricWall offers a variety of tools depending on the type of track and layout.
